

Deliverable 9.6 “Report on the Final Project Workshop”

This deliverable will be produced in the framework of WP9 (Dissemination Activities) within the task 9.5 “Project final Workshop”, planned for M42 (April 2017).

A final project workshop is proposed in order to increase the dissemination of the scope and the results reached during the WEAM4i lifetime. This conference will be focused on the targeted stakeholders and all partners will be the responsible of its success. Targeted audiences will include:

- Irrigation and agriculture community, as potential end-users of the tool developed in WEAM4i.
- Public authorities, in particular water authorities, will be targeted for awareness raising on the benefits of integrated approach for irrigation and energy management;
- Water utilities and companies providing integrated solutions for irrigation, to raise their awareness as potential user or resellers of the technological solutions developed by the project;
- International community concerned by Water-Food-Energy nexus, to provide them with the knowledge resulting from the demonstration sites;
- ICT sector
- Policy makers

The workshop will be celebrated in Barcelona on 6th April 2017. The announcement has already been launched in the project website ([link](#)):

The primary agenda ([link](#)) includes a morning session to present success case studies plus presentations by important speakers on water governance and future of energy on irrigation.

The afternoon session will include parallel sessions on the WEF nexus focusing on the policy perspectives, in parallel to B2B roundtables gathering the end-users with the producers of WEAM4i smart irrigation tool.
